NOTARY NODE TEAM CANDIDATURE

Common application for **2 x 4** (independent) **Komodo notary nodes**.

We believe in the need to provide the best possible network nodes – with the best available infrastructure and connection – **close to worlds internet hotspots!**

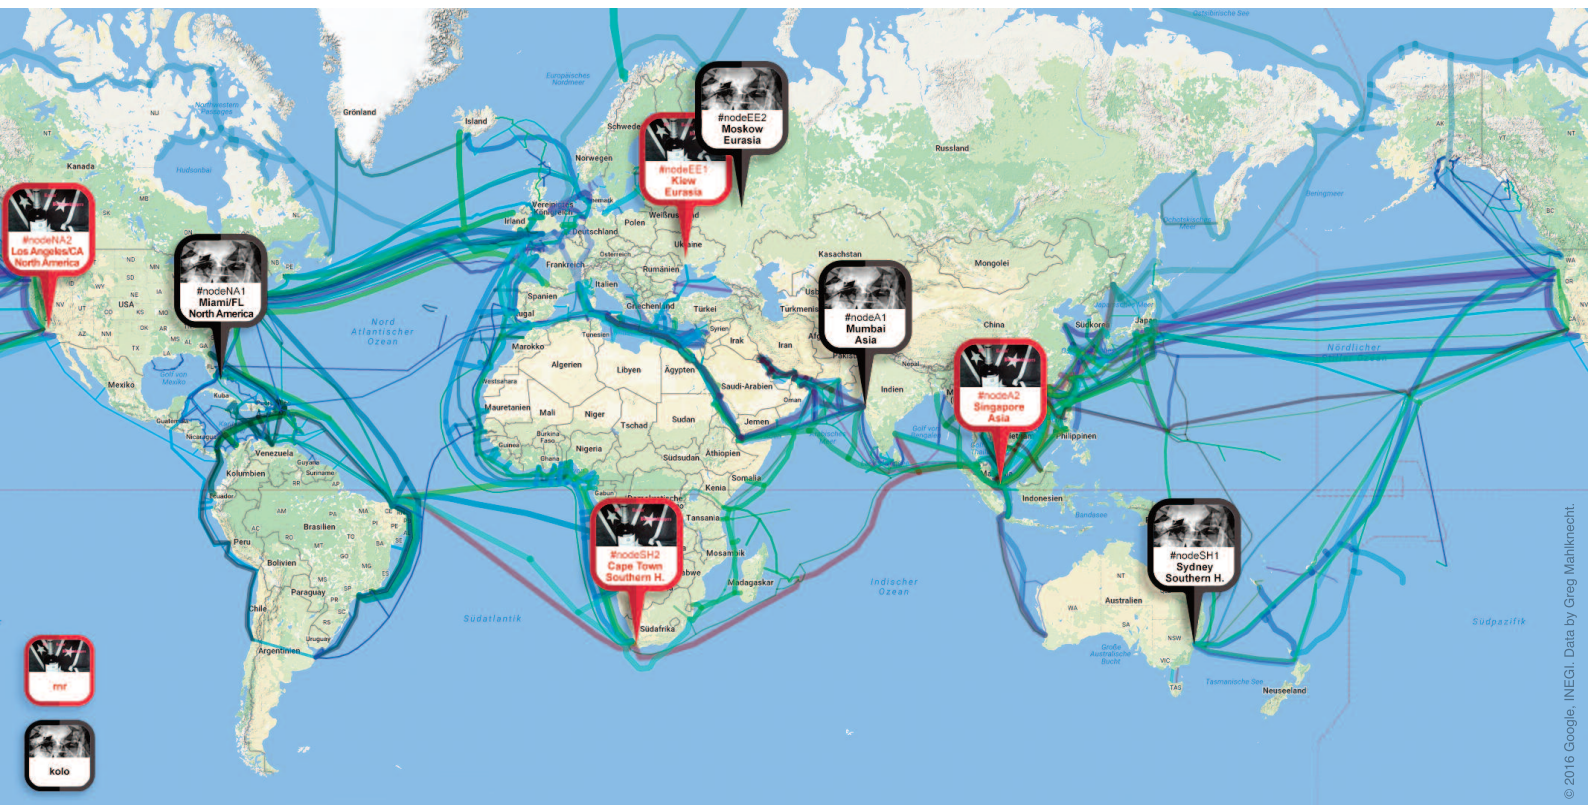

jl777:

"A notary node will need to run all the assetchains and als DEX orderbook, also will be doing price feeds, RNG beacon and poker deck shuffling."

That require high performance hardware and **low tatency!**

We provide: Independent dedicated server, connected and along to worlds prime & best internet connections – **transnational** – to guarantee an high availability of Komodo:

2 x 4 POWERFUL DEDICATED SERVER

- ✓ Intel Xeon Server-CPU
- ✓ Up to **12 Cores / 24 Threads**
- ✓ Up to **128 GB** Ram
- ✓ Uo to **2 x 1,000 GB** SSD (Raid 1)

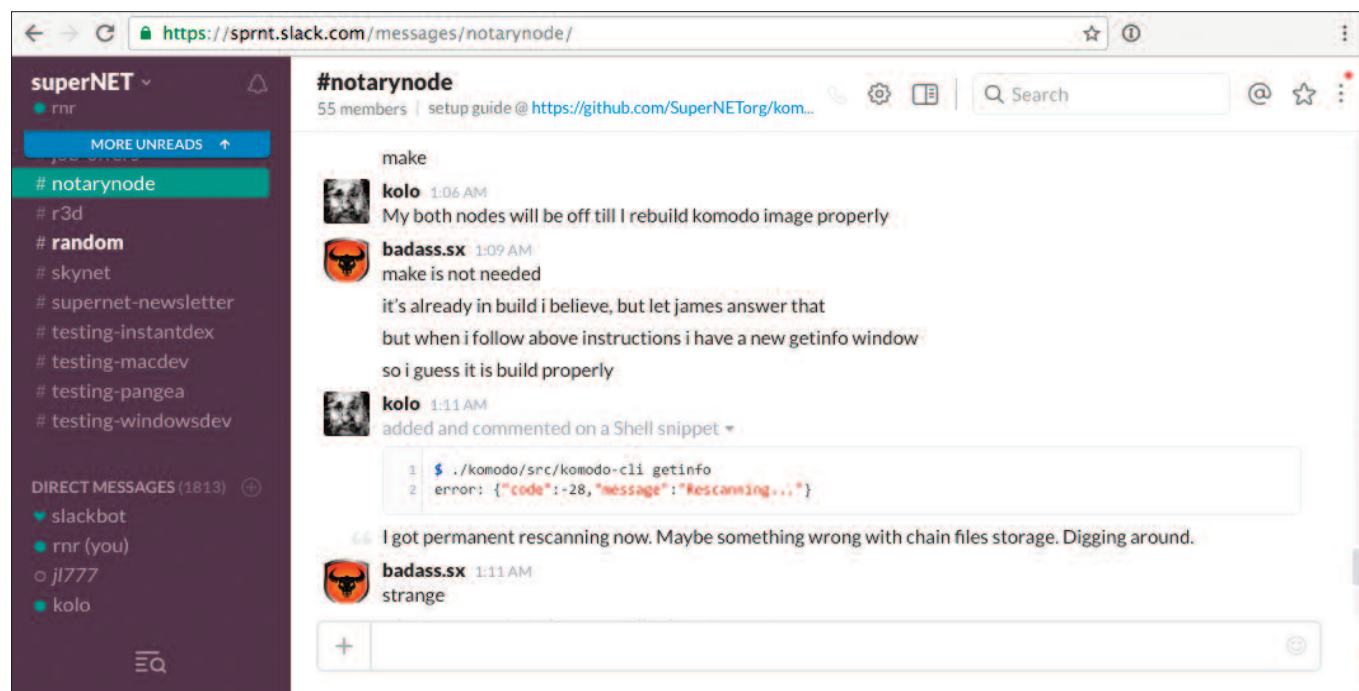

STRATETIC IP-LOCATIONS GLOBALLY CONNECTED

- ➔ Up to **1,000 Mbps** Internet Port
- ➔ **Tier III + II** Datacenter
- ➔ Close to main **sea cable** landing points
- ➔ **8 x different** Hosting-Provider

Sysadmin & Development

NOTARY NODES ADMINISTRATION

The project **Komodo Platform** is in constant developing process and together as a team we insure reliable human resources & competent knowledge in scripting, crypto, command line and sysadmin (Linux) to be up and current with our global nodes!

Debugging

Profound skilled admins are able to properly operate, update and debug software being constantly in development – for keeping it safe and stable.

Developing

Grow a new big network means also building an ecosystem of tools for it. Prepacked docker, node monitoring, block explorers, statistics and admin tools.

Competence in Eurasia, Asia, North America, Africa and Australia:

Apart from the daily sysadmin tasks to run the notary servers we also want to take part of develop tools for an easy node setup, project support and monitoring system.

SYSADMIN VALID SERVER SETUP

- ➔ Secured and tweaked **Linux OS**
- ➔ Nodes **Administration**
- ➔ Focused on tx-Notarization
- ➔ Komodo, Iguana compiling

ADDED VALUE KOMODO RELATED

- ➔ Best **IP-locations research**
- ➔ Work effort in **Testnet participation**
- ➔ Developing
- ➔ Continuous **Slack & Status monitoring**

Backup INDEPENDENT

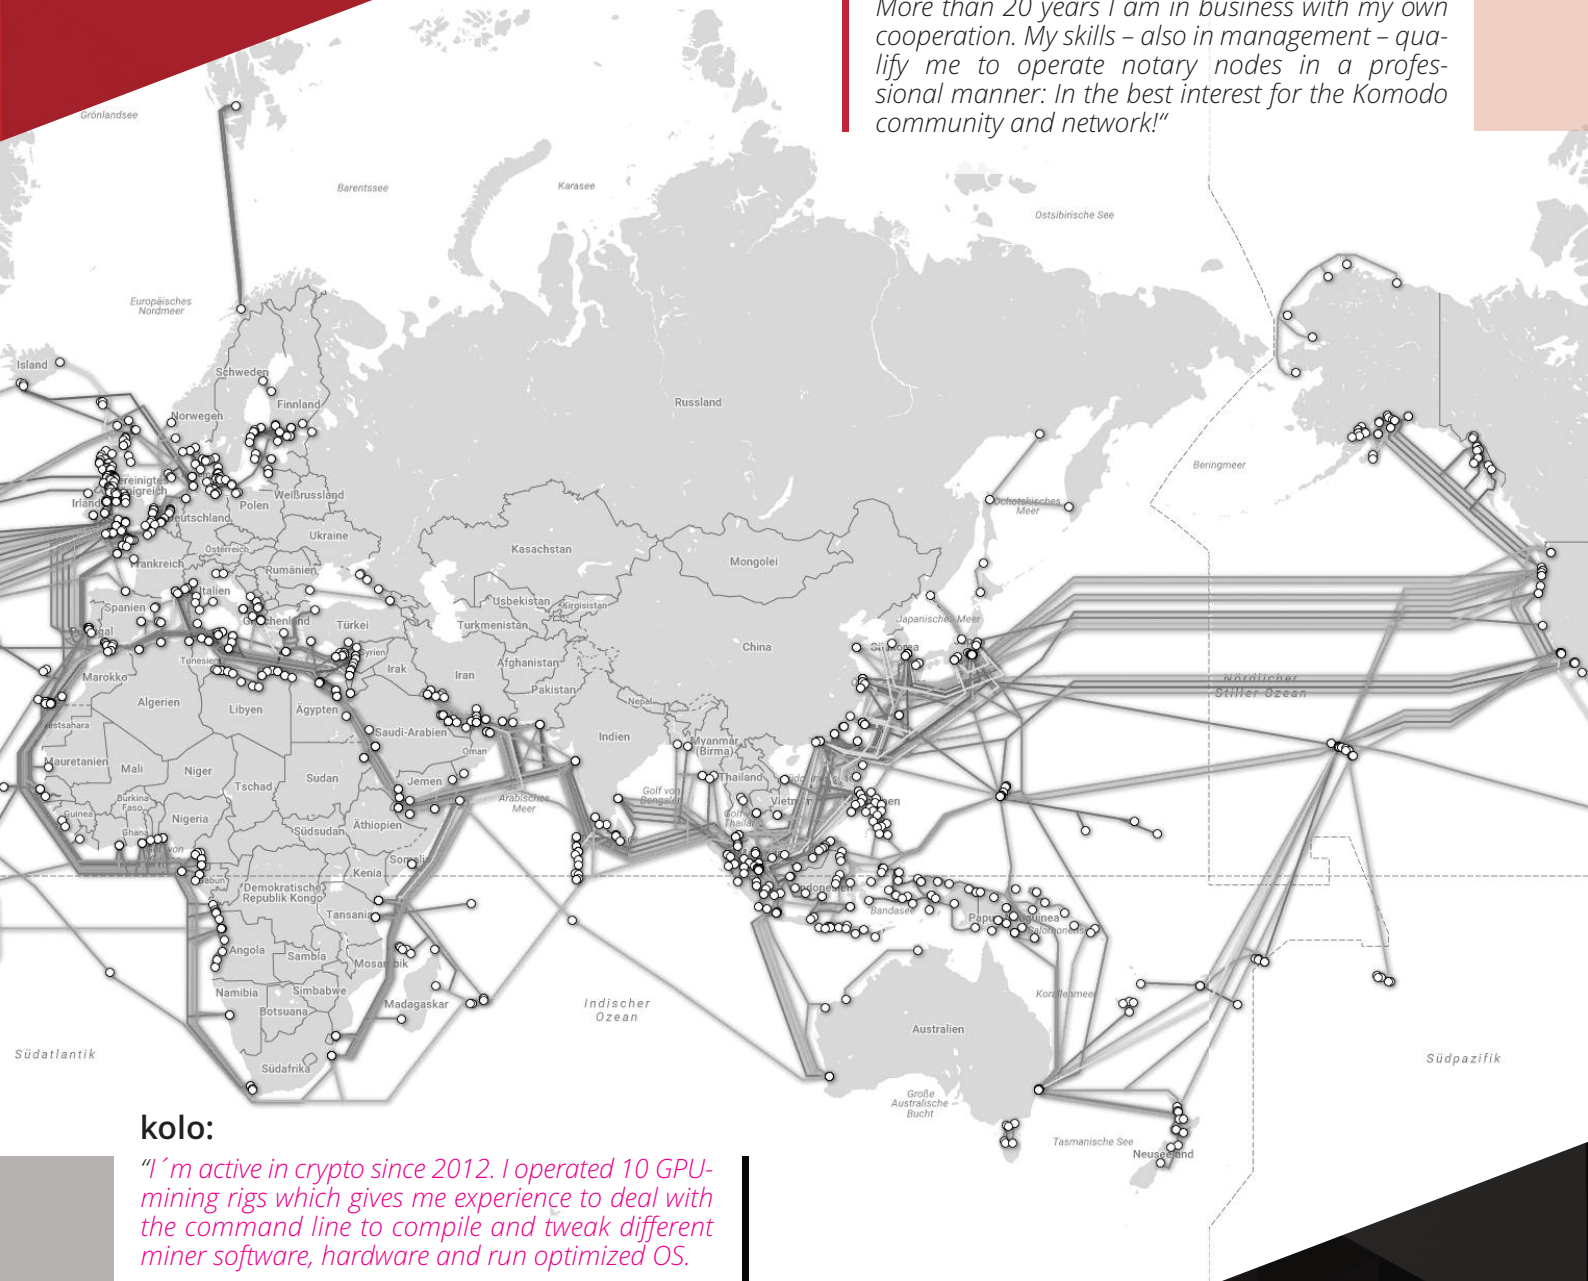

Each of us are run and operate 4 nodes independent from each other.

rnr:

"I'm active in crypto since 2012. I operated 10 GPU-mining rigs which gives me experience. I am able to dive easily in cryptocurrency mechanisms for compile and tweak software and optimized hardware.

More than 20 years I am in business with my own cooperation. My skills – also in management – qualify me to operate notary nodes in a professional manner: In the best interest for the Komodo community and network!"

kolo:

"I'm active in crypto since 2012. I operated 10 GPU-mining rigs which gives me experience to deal with the command line to compile and tweak different miner software, hardware and run optimized OS.

Since 20 years I am in business with my own cooperation – this qualifies and makes me reliable to operate the following notary nodes in a professional manner in the best interest for the Komodo community and network:"

Progress MUTAL SUPPORT

We backup each other to provide failure-free nodes.
